

Angels

It is not known precisely where angels dwell –
Whether in the air, the void, or the planets.
It has not been Gods pleasure that we should be
informed of their abode.

~ Voltaire ~

Angels are essentially messengers, providers of comfort, influence and protection. They bring to us a strong reassuring presence that we are not alone.

They evolve on a higher vibratory frequency than us, so cannot exist on earth in the same way that we do. They are intelligent beings that can feel emotions.

At birth an angel is assigned to each one of us, and brings with them our book of promises. This is our soul contract that was made before we were born. Our angels are aware of our purpose but made a promise to reveal only one thing at a time to us. This ensures that we learn things at our own speed and at a gradual pace. Since the earth plane is a free will zone, our angels will not interfere with our choices but they can help us along the way. As long as it will not cause hurt to ourselves, or anybody else and it is in alignment with our soul`s purpose then our prayers will be answered.

Communication from our angels is often subtle through signs and coincidences. There are many different signs you may receive from your angel.

They have been known to show themselves as bright coloured or bright white light. These lights can vary from tiny sparkles, to spotlights or even bursts of light.

Angels are able to surround you with a beautiful floral fragrance , it will seem to waft up from nowhere in particular then just as quickly as it appears it will be gone.

Finding a feather is a common form of communication, they can appear on the ground or seen floating in the air.

They have even been known to leave the gift of a coin in unusual places.

Occasionally people have seen outlines or silhouettes of a full or partial angelic form.

I have known of people including myself in times of anxiety to have seen huge outlines of angel forms .

Angels do their best to get our attention, and they hope you will be aware of them. When signs come try to acknowledge them and give thanks to the Angels for sending them.
